## Professional Summary

Motivated data analyst and computer science student with hands-on experience in Power BI, Python, SQL, and data modeling. Background as an IT Support Specialist, demonstrating strong communication, troubleshooting, and problem-solving abilities. Skilled in building dashboards, performing business analysis, and generating insights through data. Comfortable working with modern analytics tools, forecasting models, and visualization platforms such as Power BI and Tableau. Fast learner with a proactive mindset, eager to grow in the data field and contribute to analytical decision-making.

## Experience

### ASAN Volunteers, Baku, Azerbaijan

### IT Support Specialist – June 2024 - August 2024

- Resolved hardware, software, and network issues; provided technical support via phone, email, and chat.
- Installed and configured software, operating systems, and updates; assisted with LAN/Wi-Fi/VPN setup.
- Monitored system alerts, escalated incidents, and documented issues in ticketing tools.
- Supported users through remote desktop tools and contributed to basic automation for repetitive tasks.

## Education

### Computer Science, VIZJA University – 2023-2027 (*Bachelor of Science)*

- Relevant Coursework: Business data analysis, Big Data, Deep Learning, Machine Learning, Artificial Intelligence, Software Engineering, OOP, Databases, Cloud & Web Security, Operating Systems

## Skills

- Microsoft Excel (Pivot Tables, VLOOKUP, Data Visualization)
- Power BI (DAX, Power Query)
- Tableau
- Python (Pandas, NumPy)
- SQL
- Data Modeling (Star Schema)
- Data Analysis
- Forecasting (SARIMAX)
- Problem Solving & Critical Thinking

## Projects

- **Olist E-commerce Analytics Dashboard — Power BI & Python**
  Built an end-to-end analytics dashboard using Power BI and Python. Created KPIs, category insights, RFM customer segmentation, and a 6-month revenue forecast using a SARIMAX model. Designed a star-schema data model and implemented DAX measures to support interactive business insights.
- **Superstore Sales Analysis — SQL, Python & Tableau**
  Analyzed the Superstore dataset using SQL and Python to uncover sales, profit, discount, and regional performance insights. Built an automated pipeline by loading Excel into SQLite, executed analytical SQL queries, and performed exploratory analysis in Jupyter. Designed Tableau dashboards showing KPIs, profit by state, category trends, and top/bottom performing segments.

## Certifications

- IBM Data Analyst – August 2025
- Google IT Support – July 2025
- Python Basics - University of Michigan – May 2025
- Programming Foundations with JavaScript, HTML, and CSS - Duke University – December 2023
- Basics of Programming - Navoica – November 2023

## Languages

- English - Full Working Proficiency
- Azerbaijani - Native Proficiency
- Turkish - Full Working Proficiency
- Polish - Beginner Proficiency
